**Sayı:** 21704200-TİM.OAİB.11.ARG7.2025/29-2986  
**Konu:** AB Korunma Önlemi

Ankara, 17/03/2025

Sayın Üyemiz,

Ticaret Bakanlığımızdan alınan bir yazıda, Avrupa BirliĐi (AB) tarafından bazı çelik ürünleri ithalatına karşı yürürlükteki korunma önleminin gözden geçirilmesine yönelik olarak 17 Aralık 2024 tarihinde bir gözden geçirme soruşturması ("functioning review") başlatıldığı; söz konusu gözden geçirme çerçevesinde Avrupa Komisyonu tarafından uygulanmakta olan önlemlerde bir deĐişikliğe gidilmesi gerekip gerekmediĐi, mevcut kotaların tahsisat ve yönetim biçimleri ile sebep olduĐu olası dışlayıcı etkiler, geleneksel ticaret akışındaki deĐişimler gibi hususların incelenmekte olduĐu; Dünya Ticaret Örgütü (DTÖ) Nezdinde Türkiye Daimi Temsilciliğimizden alınan bir yazıda belirtildiĐine göre mezkûr Soruşturma kapsamında mevcut önlemlerin uygulanma şekline ilişkin olarak yapılması öngörülen deĐişikliklere dair 10 Mart 2025 tarihinde DTÖ Korunma Önlemleri Komitesine bir bildirim yapıldığı belirtilmektedir.

Bir örneĐine ekte yer verilen Bildirimden incelenmesinden, Komisyon'un önleme konu kategorileri ithalat baskısının ciddiyetine göre dört gruba (çok ciddi, ciddi, makul veya ithalat baskısı yaratmayan) ayırdığı ve uygulamadaki deĐişikliklerini bu kategorilere yapacağı görülmektedir. Bu çerçevede, mevcut uygulamada Kategori 1'in 1A ve 1B şeklinde ikiye ayrılacağı, 1B kategorisinin 7212.60.00 CN kodu altında sınıflandırılan ürünleri içerirken mevcut önlemlerde 1.kategoride sınıflandırılan ürünlerin 1A kategorisinde yer alacağı belirtilmektedir. Komisyon ayrıca, ithalat baskısının ve tüketimde düşüşün tespit edildiĐi kategorilerde (Kategori 1, 2 ve 3) ülke spesifik kota sahiplerine 4. çeyrekte artık kotaya (diĐerleri kotası) erişim sağlanmasının artık uygun olmadığı sonucuna ulaşmıştır.

DiĐer taraftan, söz konusu Bildirimde halen %1 olarak uygulanan liberalizasyon oranının %0,1'e çekileceĐi, ülkemizin halihazırda önleme tabi olduĐu 3A ve 8 kategorilerinde önlem kapsamından çıkarılacağı, Kategori 1'de yukarıda yer verilen deĐişiklik sonrası yine 1B kategorisinde de önleme tabi olmayacağı müşahede edilmektedir.

Bilgilerini ve konuyla ilgili görüşlerinizin 18 Mart 2024 mesai bitimine kadar Genel Sekreterliğimiz ([demir@oaib.org.tr](mailto:demir@oaib.org.tr)) adresine iletilmesini rica ederim.

Musa DEMİR

***NOTIFICATION PURSUANT TO ARTICLE 12.1(C)  
OF THE AGREEMENT ON SAFEGUARDS***

***NOTIFICATION PURSUANT TO ARTICLE 9, FOOTNOTE 2  
OF THE AGREEMENT ON SAFEGUARDS***

***EUROPEAN UNION***

***Certain Steel Products***

The following notification, dated 10 March 2025, is being circulated at the request of the Delegation of European Union.

Pursuant to Articles 12.1(c) and Article 9 footnote 2 of the Agreement on Safeguards, the European Union ('the Union') hereby notifies to the Committee on Safeguards of its proposed adjustments to the safeguard measure on imports of certain steel products following a review of its functioning. This notification contains all pertinent information relating to the proposed adjustments, in accordance with Article 12.2 of the Agreement on Safeguards, and an offer of consultations pursuant to Article 12.3 of the Agreement on Safeguards.

**1. Precise description of the product involved**

The product concerned is certain steel products belonging to the 26 product categories listed in **Annex I** to this Notification.

**2. Description of the proposed measure**

Background and procedure

By Implementing Regulation (EU) 2019/159, the European Commission imposed a definitive safeguard measure on certain steel imports ('the measure'). The measure consists of tariff-rate quotas ('TRQs'), covering 26 steel product categories. The TRQs are set at levels preserving traditional trade flows on a per-product-category basis. Where the relevant TRQ is exhausted, an out-of-quota duty of 25% is levied.

On 29 November 2024, the Commission received a substantiated request by thirteen Member States to initiate a functioning review. The request contained evidence of a change of circumstances since the last review of the measure. In particular, the request contained information regarding the contraction in Union demand for steel, resulting in widening gaps with the current level of duty-free quota volumes as these have been continuously liberalised. Moreover, China's steel export surges to major regions have pushed exports from other markets to the EU. The Commission considered that the information provided, including the sources and supporting evidence, constitute a sufficient basis to initiate an investigation.

Accordingly, the Commission initiated a functioning review investigation by means of a Notice of Initiation published on 17 December 2024. The Notice invited interested parties to provide evidence and data in the form of questionnaires, submissions and rebuttals to determine whether it would be justified to adjust the functioning of the safeguard measure in order to keep the operation of the safeguard adapted to market evolution and in line with the interest of all stakeholders. The Commission received 12 questionnaire replies, 40 submissions and 22 rebuttals.

### Commission assessment

The Commission first analysed the current situation and outlook of global overcapacity, as well as the economic situation of the Union industry and the latest developments concerning trade measures on steel imports adopted by third countries, notably the US' announcement of the termination of previous country exclusions and TRQs under the Section 232 and the subsequent risk of additional trade diversion into the Union. On this basis the Commission determined that the management of TRQs needs to be adapted, to ensure the effectiveness of the measure and bearing in mind the Union interest.

In view of the comments received from interested parties, the Commission has decided to evaluate the situation on a category-by-category basis across the 26 categories included in the safeguard. The Commission in its assessment analysed in particular the quota usage in the previous safeguard year, the evolution of Union consumption and the market share of imports in each of the categories. In addition, also the available capacity of the Union industry was taken into account as well as the available sources of supply and the specific concerns of interested parties raised as regards quota usage. The Commission paid particular attention to the developments of these factors in 2024.

On this basis, it appeared that while in certain categories, the measure continues to be effective, in many others, an increase of import volumes disproportionate to the development of consumption has occurred, undermining the effectiveness of the measure. The Commission found however that there was not uniform import pressure. Therefore, the Commission sorted the categories according to the severeness of the situation in four groups: (1) very significant import pressure, (2) significant import pressure, (3) moderate import pressure and (4) no import pressure.

### Adjustments

The Commission considered it necessary to introduce a series of adjustments and refinements to the management of the TRQs in the categories where the effectiveness of the measure is undermined. The Commission noted that TRQs have been liberalized by 25% over the years, despite a decrease in consumption. At the same time, many exporting countries have been allowed to exceed their traditional trade flows significantly, for example, due to the access regime that allows country-specific quota holders access to the residual quota in the last quarter, as well as the redistribution to all exporting producers of volumes in country-specific quotas whose holders are subject to import bans in the context of sanctions. These actions granted exporting producers access to the EU market above and beyond the obligations of the EU. They were taken in the overall interest of the European Union, particularly to benefit users and accommodate expected increases in demand. However, in light of the current market conditions, the Commission considers it necessary and appropriate to make adjustments to the current measure. While some of those adjustments are horizontal in nature, most are specific to certain product categories.

#### **A. Category 1**

The Commission identified the crowding out of a highly specific product in category 1 as a consequence of introducing the 15% cap in the second functioning review. This product, under CN Code 7212 60 00, is highly specialised and has a significantly higher value as compared to other products in category 1. Therefore, category 1 will be split into two: a sub-TRQ (category 1B) of a very small volume covers the abovementioned CN code of the highly specific product, while the remaining codes are included in category 1A.

## B. Level of Liberalisation

The current rate of liberalisation is 1%. The Commission considers it appropriate to reduce the liberalisation rate to 0,1% in order to ensure the effectiveness of the measure.

Data shows that the liberalisation rate in the past has largely outpaced the evolution of consumption. While TRQs have been increased by almost 25% since the measure was imposed (including the 5% top-up applicable since February 2019), consumption decreased by -14% over the same period. These opposing trends have therefore significantly widened the gap between the level of TRQs and the market demand and created an opportunity for imports to significantly increase their market share. The latest market outlooks on world steel consumption only foresee a modest recovery in 2025 (reaching 2023 levels), which the Union market is expected to follow.

Therefore, in view of the recent negative trend and outlook on steel consumption in the world and the Union steel market, the Commission considered that it is not in the Union interest to increase further the current large gap between the pace of TRQ volume increase and that of steel consumption. Therefore, the Commission considered that maintaining or increasing the current 1% rate would seriously undermine the effectiveness of the measure.

Together with other adjustments presented in this Notification, this rate of liberalisation will contribute to improving the effectiveness of the measure in a period where the Union market is suffering significant import-driven tensions, caused by the negative effects of overcapacity and the resulting responses to it across the world, in a context of weak demand. Exporting producers and Union users will continue to have sufficient free-of-duty volumes available under existing TRQs.

## C. Update of the list of WTO developing country members excluded from the scope of the measure based on their most recent level of imports

Following the adoption of the definitive safeguard measure, the Commission committed to reviewing, on a regular basis, the list of developing countries excluded from the scope of the measure based on updated import statistics.

The Commission updated the list of exclusions from the measure based on 2024 (full year) import data. The results of this analysis are presented in **Annex II** to this Notification.

## D. Access of countries having a specific quota to the residual quotas in the last quarter of the year

The Commission considered it in the Union interest to introduce in the definitive Regulation a mechanism whereby larger exporters having exhausted their country-specific quota could also access the residual quota volumes in the last quarter. The objective of this mechanism was to avoid that volumes of the residual quotas would potentially remain unused.

Under the first functioning review, the Commission created a system whereby each product category would fall within one of three different groups, corresponding to three different access scenarios: access, no access or a special regime.

The system allowed country-specific quota holders to exceed their traditional trade flows in most product categories by accessing the residual quota in the last quarter of a period when the incumbent suppliers were not able to fully use the quotas.

However, in the current context of general deceleration in the Union steel market, the Commission considers it no longer appropriate to provide quarter 4 access to country-specific quota holders in those categories where import pressure and decreasing consumption has been identified (groups 1, 2 and 3). In these cases, imports have been negatively impacting the Union industry's economic situation. The Commission also established on the basis of the questionnaire replies of the Union industry that in all these categories the Union industry had sufficient capacity to fulfil the potential demand of the users. The result of this adjustment is the following **(Annex III.3)**:

- No access: 1A, 1B, 2, 3B, 4A, 5, 6, 7, 13, 14, 15, 16, 18, 19, 20, 21, 22, 24, 25B, 26.
- Access: 3A, 9, 10, 12, 27, 28.

The categories for which this system does not apply are the following:

- Special regime: 1 and 4B.

The current regime that grants access to the residual quota in the last quarter to countries holding a country specific quota with a 30% cap per exporting country continues to be appropriate in order to ensure sufficient variety of sources of supply while avoiding crowding out effects through excessive additional imports beyond traditional trade flows.

- Global administration: 7, 8, 17, 25A.

The possibility to access the last quarter is not applicable, as there are no countries exporting under a country-specific quota.

### **E. Sanction volumes**

Following Russia's unprovoked war of aggression against Ukraine, the European Union banned the import of certain steel products originating in Belarus and Russia. In order to prevent that these import bans did not create a shortage of supply, the Commission considered it in the Union interest to adjust the functioning of the safeguard measure by redistributing the import volumes originating in Russia and Belarus (the sanction volumes) in each product category where these countries had country-specific quotas, among other exporting countries subject to the safeguard measure. This decision has increased the access of all trading partners to duty-free volumes, beyond their traditional trade flows.

However, given the current context of general deceleration in the Union steel market and its outlook, the Commission considers it no longer in the Union interest to have these volumes available in the categories in which the Union industry is facing the strongest import pressure, and where consumption has notably decreased. Therefore, the Commission considers it appropriate to reverse the earlier redistribution fully or partially in those categories falling under groups 1 and 2.

Accordingly, the Commission considers it appropriate to reverse this redistribution in category 24. This category is characterised by a decreasing trend in consumption in 2024, while imports gain market share. Reversing the redistribution will align the TRQs with current and projected demand, without risking a shortage of supply as sufficient duty-free volumes will still be available for user industries.

For categories 1A, 7, 16, and 21, the Commission also considers it appropriate to reverse the redistribution, but up to 65% of the volumes. These categories show decreasing consumption in 2024, while imports gain market share. However, reversing the redistribution of the full volumes subject to sanctions would risk a shortage of supply for user industries. Therefore, the Commission considered it appropriate to retain 35% of the volumes subject to sanctions in these categories redistributed over all origins.

### **F. Caps in residual quotas**

In light of the claims from interested parties that certain exporters significantly increased their exports in specific categories within the residual quota, resulting in the crowding out of others, the Commission has assessed the situation in each of the 26 categories. The analysis confirmed that recent market developments have resulted in a decrease of exports of traditional suppliers to the Union under the residual quotas in some categories while exports from other suppliers have significantly increased under the same residual quotas. This change of trade flows has disrupted the balance of origins in the residual TRQs, thus negatively impacting the functioning of the measure in some categories. In other categories, the Commission has identified a risk of crowding out.

Based on the above, the Commission considers it appropriate to impose a limitation to the maximum volume that one single country can export under the residual TRQ in those categories where crowding out occurs, or where a risk of crowding out has been identified. The following caps for the countries and categories should be applied:

Categories 1A, 2:	13%
Categories 16, 17:	15%
Categories 4B, 6, 7, 13:	20%
Categories 4A, 5, 14:	25%
Categories 3B, 20, 21, 25B, 26:	30%

These levels have been identified with the aim of enabling incumbent suppliers under the residual quotas to continue exporting their historical (and liberalised) trade flows, while maintaining the stability of traditional trade flows for countries that were at risk of being crowded out.

### **G. Carry-over**

The Commission considered it in the Union interest to allow Union users to make the fullest use of the duty-free volumes under the TRQs and consequently allowed in the Definitive Regulation unused quarterly tariff-rate quota allocations to be automatically carried over to the next period. However, in the present investigation, the Commission has observed that such carrying over of volumes has contributed to increasing import pressure in certain quarters and certain categories.

Taking into consideration the current context of general deceleration in the Union steel market and its outlook, the Commission considered that allowing this carry-over of unused quotas is no longer in the Union interest, notably in the categories in which the Union industry is facing the strongest import pressure, and where consumption has decreased in 2024.

On this basis, the Commission considers that the possibility to carry-over of unused volumes from one quota quarter to the next should be repealed in the categories where significant import pressure is identified (groups 1 and 2), namely in categories 1A, 2, 4A, 5, 6, 7, 14, 16, 17, 18, 20, 21, 22, 24 and 25B.

The Commission considers the carry-over mechanism to remain appropriate in the categories where low import pressure is identified (groups 3 and 4), namely in categories 3A, 3B, 4B, 8, 9, 10, 12, 13, 15, 19, 25A, 26, 27 and 28.

### **3. Proposed date of introduction of the measure**

The following proposed adjustments, if adopted, will come into effect on 1 April 2025: the split of category 1, updating the list of WTO developing country Members excluded from the scope of the measure, removal of access to the residual quota in certain categories, redistribution of sanction volumes and the introduction of caps in certain categories.

The following proposed adjustments, if adopted, will come into effect on 1 July 2025: rate of liberalisation and repeal of carry-over in certain categories.

### **4. Duration of the measure**

The duration of the measure remains until 30 June 2026<sup>1</sup>.

### **5. Expected timetable for progressive liberalization of the measure**

The measure will continue being progressively liberalized, at regular intervals, at the beginning of each period of application. The rate of liberalisation foreseen in the proposed prolongation of the measure is an increase of the TRQ volume by 0,1% yearly.

<sup>1</sup> 30 June 2026 at 23h59, Brussels time.

**6. If the notification relates only to a finding of serious injury or threat thereof, and does not relate to a decision to apply or extend a safeguard measure**

Not applicable.

**7. Information relating to exporting members**

**(i) The major exporting Members of imports of the product involved.**

The main exporting countries of the product concerned are the following: Türkiye, India, People's Republic of China, Republic of Korea, Egypt and Vietnam.

**(ii) Developing countries excluded**

The list of developing countries that will continue being subject to the safeguard measure is Attached as **Annex III**.

**8. Invitation for consultations**

Consistent with Article 12.3 of the Safeguards Agreement, the European Union is prepared to consult with those Members having a substantial interest as exporters of the product concerned, with a view to exchanging views on the measure proposed.

Consultations will take place, either in person in Brussels (Belgium) at the Commission premises, or on a virtual setting, from **Tuesday March 11<sup>th</sup> until Tuesday March 18<sup>th</sup>**.

Members wishing to engage in consultations should directly contact either the European Union Delegation in Geneva or the Commission at:

[TRADE-SAFE009-REVIEW@ec.europa.eu](mailto:TRADE-SAFE009-REVIEW@ec.europa.eu)

Members should indicate in their email at least two different time slots for the consultations and, if possible, provide the names and email addresses of the participants.

**9. Members are encouraged to attach, in an electronic form, publicly available document(s) containing the relevant decision(s) made by the competent authority.**

Not applicable at this stage.

**ANNEX III.3 – Maximum volume of residual quota accessible in last quarters to countries with a country specific quota**

Product category	New allocated quota in tonnes	
	From 1.4.2025 to 30.6.2025	From 1.4.2026 to 30.6.2026
1.A	No access to the residual quota in Q4	No access to the residual quota in Q4
1.B	253,87	254,12
2	No access to the residual quota in Q4	No access to the residual quota in Q4
3.A	849,52	850,37
3.B	No access to the residual quota in Q4	No access to the residual quota in Q4
4.A	No access to the residual quota in Q4	No access to the residual quota in Q4
4.B	Special regime	Special regime
5	No access to the residual quota in Q4	No access to the residual quota in Q4
6	No access to the residual quota in Q4	No access to the residual quota in Q4
7	Not applicable	Not applicable
8	Not applicable	Not applicable
9	53 183,34	53 236,52
10	1 042,04	1 043,09
12	60 691,28	60 751,97
13	No access to the residual quota in Q4	No access to the residual quota in Q4
14	No access to the residual quota in Q4	No access to the residual quota in Q4
15	No access to the residual quota in Q4	No access to the residual quota in Q4
16	No access to the residual quota in Q4	No access to the residual quota in Q4
17	Not applicable	Not applicable
18	No access to the residual quota in Q4	No access to the residual quota in Q4
19	No access to the residual quota in Q4	No access to the residual quota in Q4
20	No access to the residual quota in Q4	No access to the residual quota in Q4
21	No access to the residual quota in Q4	No access to the residual quota in Q4
22	No access to the residual quota in Q4	No access to the residual quota in Q4
24	No access to the residual quota in Q4	No access to the residual quota in Q4
25.A	Not applicable	Not applicable
25.B	No access to the residual quota in Q4	No access to the residual quota in Q4
26	No access to the residual quota in Q4	No access to the residual quota in Q4
27	31 550,19	31 581,74
28	49 399,36	49 448,76
